Art Unit: 3641

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claima 1-12 and 31-32, drawn to a recoil buffering apparatus, classified in class 89, subclass 42.01.
 - II. Claims 13-18 and 27-29, drawn to an elevating apparatus, classified in class 89, subclass 37.07.
 - III. Claims 19-26, drawn to a traversing apparatus, classified in class 89, subclass 37.13.
 - IV. Claims 30 and 33, drawn to an artillery gun, classified in class 89, subclass 37.05.
 - V. Claims 34-37, drawn to a muzzle brake, classified in class 89, subclass 14.3.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention a recoil buffering apparatus has separate utility such as utility without an elevating apparatus or with a different type of elevating apparatus. See MPEP § 806.05(d).
4. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I (a recoil buffering apparatus) has separate utility such as with a different type of traversing apparatus or without a traversing apparatus. See MPEP § 806.05(d).
5. Inventions V and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention V (a muzzle brake) has separate utility such as utility without a traversing apparatus or with a different type of traversing apparatus. See MPEP § 806.05(d).

6. Inventions IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claims 36 and 30 (Bsp and A). The subcombination has separate utility such as utility with a different type of artillery gun.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete **must include an election of the invention to be examined** even though the requirement be traversed (37 CFR 1.143).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Johnson whose telephone number is 703-306-4158. The examiner can normally be reached on Tuesday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone numbers for the
